

# Karina Siniatullina

## Android/Flutter developer

A beginning developer of mobile applications for Android and Flutter. 2nd year student of the Data Analysis and Artificial Intelligence program at Innopolis University. I have no experience working in companies. I quickly master new programs, gain skills, and have experience working in Mobile development projects. In teams, I find a common language with teammates, participate in the discussion of the project, offer new ideas, and take on tasks. I am ready to learn new tools, participate in projects and work in a team.
